

The Perfect Chair® by Human Touch®

PERFECTION IS REALITY

 human touch®
Your best. Every day.™

AT HUMAN TOUCH®, OUR VISION WAS TO CREATE A CHAIR SO EXTRAORDINARY, IT WOULD DESERVE TO BE CALLED THE PERFECT CHAIR®. By skillfully blending contemporary architecture with old-world craftsmanship, we laid the foundation for the chair's bold, yet classic look. We then integrated our unique, zero gravity technology, utilizing true neutral-posture to create a complete seating concept that transcends common comfort. Not by coincidence, the Perfect Chair's body-frame ergonomics are inspired by the neutral body posture chaise position developed by NASA to support astronauts during their ascent into orbit.

Aesthetically and technically, the Perfect Chair reflects Human Touch's commitment to creating products of superior quality and value. The result is a chair that uniquely and beautifully combines form and function—perfectly.

THE PERFECT SOLUTION

ZERO GRAVITY, ERGONOMICS, AND WELLNESS

An elongated, full-support pillow cradles the head and neck while providing ergonomic support

Zero gravity seating expands lung capacity, allowing for deeper, more relaxed breathing

Elevation of the legs above the heart helps improve blood flow

Backup battery allows you to restore the chair to an upright position in case of a power outage

Nickel-plated, steel glide rails provide smooth, effortless recline and superior durability

A revolution in seating design, the dual-motor power allows independent positioning of the recline angle and leg elevation

Articulating headrest allows you to customize your seating comfort and optimize your position to relieve muscle tension, soreness, and fatigue

Neutral-posture positioning evenly distributes your body weight to eliminate painful pressure points

THE PERFECT FIT

Choose **manual** or **power** recline—either way, you'll find the perfect recline angle to cradle your body in weightless comfort.

PERFECT CHAIR **PC-420** CLASSIC **MANUAL PLUS**

Escaping gravity's adverse effects is as easy as leaning back in the chair. A concept that is simply brilliant and effective.

PERFECT CHAIR **PC-610** **OMNI-MOTION CLASSIC**

Our most adjustable Perfect Chair ever gives you a power recline to easily and independently position your recline angle and leg elevation, allowing for infinite comfort positions.

PERFECT CHAIR **PC-600** **OMNI-MOTION SILHOUETTE**

With its sleek lines, tapered design and slimmer frame, this elegant chair is the perfect choice for those smaller in stature. The Silhouette also features a power recline.

THE FINEST MATERIALS

Drawing on the heritage of several decades of experience, our precision-engineered chairs are in a class of their own, presenting a quality not found in other zero gravity recliners. Each of our artisans must serve a two-year apprenticeship before they are allowed to craft the uniquely balanced curve that supports the Perfect Chair. All materials are polished, matched, and finished to obtain the highest level of luster and brilliance.

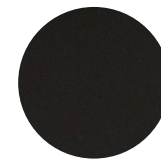

Hand-cutting, shaping, and drying the legs of the Perfect Chair.

CUSTOMIZE YOUR PERFECT CHAIR

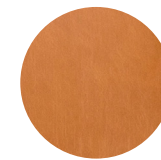

Aniline-dyed hides from the United States and Brazil are carefully measured, cut, and sewn to keep the supple leather luxurious, resilient, and soft to the touch. Beautiful French triple-stitching reflects the quality, time, and dedication invested in each pad set's upholstery.

EXTENDED FOOTREST

Adds an additional 6" to the length of the chair. Compatible only with the PC-420.

*Available in Walnut, Dark Walnut and Matte Black.

DECADES OF PERFECTION

For over 25 years, the iconic curved lines and ergonomic zero gravity design of the Perfect Chair has changed the lives of thousands of proud owners. Take a seat and bask in its rich history of innovation and dedication to wellness. It really is—the Perfect Chair.

Introduced in 1995, the classic Perfect Chair design has stayed constant throughout.

“

With the body in neutral posture, pressure is evenly distributed from the heels all the way to the back of the head. This reduces stress and allows the individual to perform activities normally done seated, not only for much longer, but in the most comfortable and healthy position possible.

— David Marcarian,
President of Precision Biometrics,
Human Touch Wellness Council Member
